

Head of development COMINT Systems

You are professional in developing tactical COMINT Systems (Applications, HW and SW). Your English is fluently, and you are open to other cultures. You are willing to take over the lead to develop an entire VHF/UHF COMINT System with a group of HW and SW engineers.

If it's matches we provide:

- An international environment, in a company with projects around the globe in the field of RF Monitoring, RF Direction Finder and Jamming Systems
- Free health and accident insurances
- A motivated developer team
- Place of working contract UAE or Switzerland
