

# SYMLAB

mastering the RF spectrum

**Mastering the RF spectrum** – Symlab AG was founded in 2016 and is growing steadily in the development and production of equipment such as jammers, receivers, transmitters, monitoring and classification devices, radio direction finders and anti-drone equipment. Symlab AG, headquartered in Freienbach, is a subsidiary of Global Clearance Solutions AG, which eliminates explosive threats and enables the reconstruction of war-torn regions.

For our **Symlab Team in Ostermundigen** we are looking for you from now on as a:

## Senior RF Engineer (m/w/d) | Wireless RF-Communication

### Your tasks:

- Development of RF circuits up to 18GHz
- Development of high-speed PCBs
- Possible development of FPGA circuits
- RF tests using modern RF equipment
- Project leading and possible team leading

### Your skills:

- Strong RF and signal processing background
- PCB (Altium Designer preferable), RF design experience
- Experience with C, C++, Linux
- Independent, self-driven, and enthusiastic personality.
- Strong solution orientation and communication skills
- Fluent in English or German

### Wir bieten dir:

Die Chance, aktiv wie sinnstiftend die Zukunft unseres global agierenden Unternehmens mitzugestalten und dich im Unternehmen weiterzuentwickeln. Flache Hierarchien, ein angenehmes Arbeitsklima, flexible Regelungen zu Arbeitszeit und Arbeitsplatz sowie eine attraktive Vergütung zeichnen uns aus.

Bewirb dich jetzt per E-Mail mit deinen Bewerbungsunterlagen und deiner Verfügbarkeit unter [jobs@symlab.ch](mailto:jobs@symlab.ch) und werde bald Teil des Symlab-Teams.

Symlab AG  
Güterstrasse 7
